INDEX TO VOLUME 37

AUTHORS INDEX

In the index, following the author's name, the title of the subject is given as it appeared in the Journal.

A

ALBANESE, ANTHONY A., HIGGONS, REGINALD A., VESTAL, BETTY, AND STEPHANSON, LOUKIA. Photochromatographic analysis of amino acids in body fluids, 885

ALBERT, A., AND ROGERS, DANA A. An improved ultrafilter for the concentration of urinary gonadotropin, 485

ALEXANDER, E. RUSSELL. (*See* LOOSLI, HULL, BERLIN, AND ALEXANDER), 464

ALPER, T., SAVAGE, D. V., AND BOTHWELL, T. H. Radioiron studies in a case of hemochromatosis, 665

ANGER, BORGHILD. (*See* BRUN, CLAUS), 955

ANSLOW, R. O. (*See* CASALS, ANSLOW, AND SELZER), 663

ARMSTRONG, C. W. J., AND LARNER, A. E. The effect of combinations of antibiotics on Pseudomonas aeruginosa and on Proteus vulgaris, in vitro and in vivo, 584

ARN, KENNETH D. (*See* CAMARA, ARN, REIMER, AND NEWBURGH), 743

ASHKENAZY, MOSES. (*See* LEROY, TWEEDY, AND ASHKENAZY), 122

ATLAS, DONALD H. (*See* GABERMAN, ATLAS, ISAACS, KAMMERLING, AND EHRLICH), 544

B

BALDRIDGE, G. DOUGLAS. (*See* KLIGMAN, BALDRIDGE, REBELL, AND PILLSBURY), 615

BARIA, WILLIAM H. (*See* NEELY, BARIA, SMITH, AND STONE), 382

BARNES, MILDRED W. (*See* FINLAND, BARNES, AND WELLS), 88

BARR, DAVID P. (*See* LUCKEY, RUSS, AND BARR), 253

BAYLES, THEODORE B. (*See* VAUGHAN, BAYLES, AND FAVOUR), 698

BENNETT, ALENE, MAY, L. G., AND GREGORY, RAYMOND. A modification of the 2,4-dinitrophenylhydrazone method for determining total acetone and ketone bodies, 643

BENNETT, JEAN, DAVIS, WILLIAM D., JR., AND SCHALES, OTTO. Application of a colorimetric method for estimation of methionine in blood and urine, 820

BERLIN, BYRON S. (*See* LOOSLI, HULL, BERLIN, AND ALEXANDER), 464

BERMAN, JEROME R. (*See* HAMBURGER, BERMAN, STEIN, FIFE, MUETHING, AND FABRIZIO), 64

BIERMAN, HOWARD R., AND JAWETZ, ERNEST. The effect of prolonged administration of antibiotics on the human fecal flora, 394

BLANKENHORN, M. A. (*See* THOMPSON, RUEGSEGGER, BLANKENHORN, AND HAMBURGER), 73

BOAND, A. V., AND KEMPF, J. E. The identification of influenza virus antibodies by means of the collodion particle agglutination reaction, 914

BOSSENMAIER, I. (*See* WATSON, DE MELLO, SCHWARTZ, HAWKINSON, AND BOSSENMAIER), 831

BOTHWELL, T. H. (*See* ALPER, SAVAGE, AND BOTHWELL), 665

BOURONCLE, BERTHA A. (*See* WRIGHT, DODD, BOURONCLE, DOAN, AND ZOLLINGER), 165

BRENNER, LOUIS O., WAIFE, S. O., AND WOHL, MICHAEL G. The eosinophile response in chronic disease and malnutrition, 593

BRODSKY, WILLIAM A. (*See* RAPOPORT, WEST, AND BRODSKY), 550

BROWN, HAROLD. (*See* JAGER, BROWN, AND NICKERSON), 431

—, TANNER, G. L., AND HECHT, H. H. The effects of potassium salts in subjects with heart disease, 506

BROWN, JOHN W. (*See* CREE AND BROWN), 104

BRUN, CLAUS. (With the technical assistance of Anger, Borghild.) A rapid method for the determination of para-aminohippuric acid in kidney function tests, 955

BURCHELL, HOWARD B. (*See* NICHOLSON, BURCHELL, AND WOOD), 353

BURDON, KENNETH L. Use of Kodachrome film and a filmstrip holder in an improved method for titration of trypsin and trypsin-inhibitors, 494

BUSSING, DOROTHY. (*See* SUKSTA AND CONLEY), 597

BUTT, HUGH R., COMFORT, MANDRED W., POWER, MARSCHELLE H., AND MASON, HAROLD L. Observations on the effect of cortisone acetate on two patients with hepatic disease, 870

C

CALLAHAN, J. B. (*See* DAVIS, SEGALOFF, JACOBS, AND CALLAHAN), 499
CAMARA, AUGUSTO A., ARN, KENNETH D., REIMER, ANN, AND NEWBURGH, L. H. The twenty-four hourly endogenous creatinine clearance as a clinical measure of the functional state of the kidneys, 743
CAMPBELL, GILBERT S. (*See* HEMINGWAY AND CAMPBELL), 143
CARPENTER, ANNA MARY (*See* FISCHER, STEINMAN, CARPENTER, AND MENTEN), 894
CASALS, J., ANSLOW, R. O., AND SELZER, G. Method for increasing the yield of complement-fixing antigens of certain neurotropic viruses, and the use of newborn mice for their production, 663
CHANDLER, J. P. (*See* ZARAFONETIS AND CHANDLER), 425
CHEN, GRAHAM, AND RUSSELL, DAVID. A method for evaluating adrenergic blocking activity, 488
CLARK, LELAND C., JR. An easily constructed apparatus for preparing ultrafiltrates, 481
COGGESHALL, HOWARD C. (*See* REID, PIKE, SULKIN, AND COGGESHALL), 264
COHEN, SHELDON G., AND MOSES, CAMPBELL. Effect of cortisone on experimental production of arteritis by passive sensitization, 764
COMFORT, MANDRED W. (*See* BUTT, COMFORT, POWER, AND MASON), 870
CONLEY, C. LOCKARD. (*See* SUKSTA AND CONLEY), 597
COOPERBERG, ARTHUR, AND SINGER, KARL. The reaction of the bone marrow to high oxygen tension in normal and anemic guinea pigs, 936
COTTEN, M. DEV. (*See* GAZES, RICHARDSON, AND COTTEN), 902
CREE, EDNA M., AND BROWN, JOHN W. Observations on the epidemiology of infectious hepatitis, 104
CRONK, G. ARNOLD, AND NAUMANN, DOROTHY E. Zirconium treatment in ivy poisoning: preliminary investigation, 909
CUSHMAN, MARGARET. (*See* WALLACE, HOLLIDAY, CUSHMAN, AND ELKINTON), 621

SUBJECT INDEX

A

Acetone and ketone bodies, determining total, modification of the 2,4-dinitrophenylhydrazone method for, 643
Acetylcholine and cholinesterase in blood in bronchial asthma, 860
ACTH, alterations in plasma proteins, plasma volume, and volume of packed red cells in patients receiving, 431
and cortisone, effect of, on pneumococcal and influenza viral infections in white mouse, 780
effect of, in idiopathic acquired hemolytic anemia as related to the hemolytic mechanisms, 444
on leucocyte counts in white mice, 458
in lupus erythematosus disseminatus, response of serum gamma globulin level and complement titer to, 698
in treatment of experimental air-borne influenza virus type A infection in the ferret, 603
influence of, on course of experimental influenza type A virus infection, 464
ACTH-like effect of fever in man, 771
Adrenergic blocking activity, method for evaluating, 488
Adrenocorticolytic drug DDD (2,2-bis (parachlorophenyl) - 1,1-dichloroethane), production of insulin sensitivity with, 229
Adrenocorticotrophic hormone, effect of, in idiopathic acquired hemolytic anemia as related to the hemolytic mechanisms, 444
in treatment of experimental air-borne influenza virus type A infection in the ferret, 603
therapy in lupus erythematosus disseminatus, response of serum gamma globulin level and complement titer to, 698
Alcohol, effect of, in per diem excretion and isomer distribution of urinary coproporphyrins, 29
ether, tetraethylammonium, and Priscoline, comparative effects of, in producing vasodilatation in peripheral vascular conditions, 365
Alkaline phosphatase of cell nuclei, 526
Amino acids and protein hydrolysates, effect of various, on uremic rat, 207
in body fluids, photochromatographic analysis of, 885
Amplifier, an inexpensive carrier, for use with resistance wire manometers, 810
Anemia, acquired hemolytic, hemagglutinins in, studies of, 165
hemolytic, primary atypical pneumonia with, high titer of cold hemagglutinins, and false positive Donath-Landsteiner test, 382
Anemia—Cont'd
idiopathic acquired, effect of ACTH in, as related to the hemolytic mechanisms, 444
of cancer and its relation to metastases to bone marrow, 182
sickle cell, and the sickle cell trait, effect of oxygen tension and pH on sickling and mechanical fragility of erythrocytes in, 789
Anthrone reagent, estimation of nonglucosamine polysaccharides of serum proteins with, 736
Antibiotics, assay of, a single, simple, turbidimetric method for, in capillary blood and other body fluid, 155
combinations of, effect of, on Pseudomonas aeruginosa and on Proteus vulgaris, in vitro and in vivo, 584
effect of prolonged administration of, on human fecal flora, 394
microbiologic assay of, nonspecific inhibition by serum and urine in, 575
of streptococci and staphylococci, in vitro sensitivity to eight, recovered from cases of bacterial endocarditis, 60
protection of intracellular Brucella against streptomycin alone and in combination with other, 924
Antibodies, influenza virus, identification of, by means of collodion particle agglutination reaction, 914
Rh_0, method for detecting, in extremely low titer, 825
Antigens, compliment-fixing, of certain neurotropic viruses, method for increasing the yield of, and the use of newborn mice for their production, 663
Apparatus for preparing ultrafiltrates, an easily constructed, 481
for tissue culture, a simplified, continuous-flow, 162
Aromatic diamidines, injection of, influence of nucleic acid upon fluorescence of nuclei and cytoplasm after, 562
Arterial blood, Evans blue dye curves in, method for continuous recording of, and its application to diagnosis of cardiovascular abnormalities, 353
Arteritis, experimental production of, by passive sensitization, effect of cortisone on, 764
Asthma, bronchial, acetylcholine and cholinesterase in blood in, 860
Atropine sulfate, variable effect of, on fasting gastric secretion in man, 415
Aureomycin, assay of, in capillary blood and other body fluid, a single, simple, turbidimetric method for, 155

Aureomycin—Cont'd
effect of, on urobilinogen formation and the fecal flora, 52
hydrochloride, in vivo and in vitro effect of, on Syringospora (Monilia, Candida) albicans, 703

B

Bacilli, streptomycin-resistant coliform, in stools of tuberculous patients treated with intramuscular streptomycin, 64
Bacteria, fungi, and viruses, pathologic responses of guinea pigs infected cutaneously with, effect of cortisone on, 615
Bacterial endocarditis, streptococci and staphylococci recovered from, in vitro sensitivity to eight antibiotics of, 60
Benemid, effect of, on plasma penicillin levels, 272
Bile, feces, urine, and blood, porphyrin chromogens or precursors in, 831
Biologic material, analysis of, application of internal standard flame photometer to, 621
materials, recovery and estimation of radioisotopes from, 644
Blood, alterations in plasma proteins, plasma volume, and volume of packed red cells in patients receiving ACTH or cortisone, 431
and urine, methionine in, colorimetric method for, application of, 820
arterial, Evans blue dye curves in, method for continuous recording of, and its application to diagnosis of cardiovascular abnormalities, 353
capillary, assay of aureomycin, chloramphenicol, penicillin, streptomycin, and terramycin in, a single, simple, turbidimetric method for, 155
enzyme studies on human, 303, 311
ergothioneine levels in disease, 199
hyperbilirubinemia, rapid screening test for its detection, 477
in bronchial asthma, acetylcholine and cholinesterase in, 860
leucocyte counts, effect of ACTH on, in white mice, 458
pH of whole arterial, 129
quantitative phenol levels, relationship of xanthoproteic indices to, in various azotemic states, 544
thermal coagulation and binding of anions in pregnancy, 538
urine, bile, and feces, porphyrin chromogens or precursors in, 831
volume determination: comparison of T-1824 and P^{32} labeled red cell methods, 342
Bloods, typing study of one hundred fifty thousand, 634
Body fluids, amino acids in, photochromatographic analysis of, 885
assay of aureomycin, chloramphenicol, penicillin, streptomycin, and terramycin in capillary blood and other, a single, simple, turbidimetric method for, 155
measurement of deuterium oxide in, by the falling drop method, 653
x-irradiation, induced pregnancy in a mammalian host following severe total, 331
Bone marrow, reaction of, to high oxygen tension in normal and anemic guinea pigs, 936
tumors, radiogallium as a diagnostic agent in, studies of, 239
Bromsulfalein test in jaundiced patients, 40
Bronchial asthma, acetylcholine and cholinesterase in blood in, 860
Brucella abortus, viability of, toxic effect of buffered saline solutions on, 579
intracellular, protection of, against streptomycin alone and in combination with other antibiotics, 924
Bubble flow meter, a continuous-recording automatic, 969
Buffered saline solutions, toxic effect of, on viability of Brucella abortus, 579
Bunsen-type burner, electrically operated, 327

C

Cancer, anemia of, and its relation to metastases to bone marrow, 182
Cardiac catheterization, O_2 consumption of patients during, a simplified, accurate method for determining, 630
Cardiovascular abnormalities, diagnosis of, method for continuous recording of Evans blue dye curves in arterial blood and its application to, 353
Carrier amplifier, an inexpensive, for use with resistance wire manometers, 810
Catheterization, cardiac, O_2 consumption of patients during, a simplified, accurate method for determining, 630
Cell, L. E., some observations on, 597
nuclei, alkaline phosphatase of, 526
Central Society for Clinical Research, presidential address, 23rd annual meeting, Nov. 3 and 4, 1950, 2
Cerebrospinal fluid globulin, precipitation of, by zinc sulfate, 374
Chloramphenicol, assay of, in capillary blood and other body fluid, a single, simple, turbidimetric method for, 155
Chlorides in serum and spinal fluid, microdetermination of, 950
Cholesterol, determination of, modified digitonin reagent for, 151
Cirrhosis of liver, isomer distribution and per diem excretion of urinary coproporphyrin in, 8

Collodion particle agglutination reaction, identification of influenza virus antibodies by means of, 914
Colorimetric method for estimation of methionine in blood and urine, application of, 820
Complement fixation techniques for laboratory diagnosis of rickettsioses, comparative evaluation of several, 388
Complement-fixing antigens of certain neurotropic viruses, method for increasing yield of, and use of newborn mice for their production, 663
Coproporphyrin, studies of. V. The isomer distribution and per diem excretion of the urinary coproporphyrin in cases of cirrhosis of liver, 8
VI. The effect of alcohol on the per diem excretion and isomer distribution of the urinary coproporphyrins, 29
urinary, determination of, improved method for, and an evaluation of factors influencing the analysis, 843
Coproporphyrins, urinary, effect of alcohol on per diem excretion and isomer distribution of, 29
Cortisone acetate, effect of, on hepatic disease, observations on two patients, 870
alterations in plasma proteins, plasma volume, and volume of packed red cells in patients receiving, 431
and ACTH, effect of, on pneumococcal and influenza viral infections in white mouse, 780
effect of, in glomerulonephritis and the nephropathy of disseminated lupus erythematosus, 133
on experimental production of arteritis by passive sensitization, 764
on pathologic responses of guinea pigs infected cutaneously with fungi, viruses, and bacteria, 615
Creatinine clearance, twenty-four hourly endogenous, as clinical measure of functional state of kidneys, 743
Cryoglobulin, influence of a, on suspension stability and sedimentation rate of erythrocytes, 253
Culture flask for estimation of growth of microorganisms by optical methods, 325

D

Desoxycorticosterone and propylene glycol, effect of, in experimental hypertension, 499
Deuterium oxide, measurement of, in body fluids by the falling drop method, 653
Diagnostic agent, radiogallium as, in bone tumors, studies on, 239
Dicumarol (3,3′-methylenebis (4-hydroxycoumarin)), colorimetric method for determination of, in plasma, 321
Dicumarol-induced hypoprothrombinemia in man, treatment of, with emulsified vitamin K_1 administered intravenously, 269
Digitonin reagent for determination of cholesterol, a modified, 151
Disease, blood ergothioneine levels in, 199
chronic, esoinophile response in, and in malnutrition, 593
Disseminated lupus erythematosus, nephropathy of, effect of cortisone in, 133
Donath-Landsteiner test, false positive, primary atypical pneumonia with, high titer of cold hemagglutinins, and hemolytic anemia, 382
Drug sensitivities, Nocardia asteroides, its pathogenicity and, 713
Dye clearance by liver, significance of decreased, following portacaval anastomosis, 515

E

Electrokymograph, use of, for determination of pulse wave velocity, 974
Electrophoresis, plasma proteins of lipoid nephrosis, qualitative and quantitative changes in, 894
Electrophoretic characterization of serum in rheumatoid arthritis, 264
Electroplating apparatus for recovery and estimation of radioisotopes from biologic materials, 644
Endocarditis, bacterial, streptococci and staphylococci recovered from, in vitro sensitivity to eight antibiotics of, 60
Endogenous creatinine clearance, the twenty-four hourly, as clinical measure of functional state of kidneys, 743
Enzyme studies on human blood. VIII. The effect of fibrinogen concentration on the thrombin clotting time, 303
IX. The fibrinogen content of stored plasma, 311
Eosinophile response in chronic disease and malnutrition, 593
Epidemiology of infectious hepatitis, observations on, 104
Erythrocytes, method for preparation of globin from human, 959
sickling and mechanical fragility of, effect of oxygen tension and pH on, in sickle cell anemia and the sickle cell trait, 789
suspension stability and sedimentation rate of, influence of a cryoglobulin on, 253
Ether, alcohol, tetraethylammonium, and Priscoline, comparative effects of, in producing vasodilatation in peripheral vascular conditions, 365
Evans blue dye curves in arterial blood, method for continuous recording of, and its application to diagnosis of cardiovascular abnormalities, 353

Experimental air-borne influenza virus type A infection in the ferret, ACTH in treatment of, 603
hypertension, effect of desoxycorticosterone and propylene glycol in, 499
infection in guinea pigs, effect of cortisone on, 615
production of arteritis by passive sensitization, effect of cortisone on, 764

F

Falling drop method measurement of deuterium oxide in body fluids, 653
Fat emulsion for intravenous nutrition in rabbits, 222
Fecal flora, human, effect of prolonged administration of antibiotics on, 394
Feces, bile, urine, and blood, porphyrin chromogens or precursors in, 831
Fever, ACTH-like effect of, in man, 771
Fibrinogen concentration, effect of, on thrombin clotting time of blood, 303
content of stored plasma, 311
determination of, in small samples of plasma, new method for, 316
Flask, culture, for estimation of growth of microorganisms by optical methods, 325
Fluorescence of nuclei and cytoplasm, influence of nucleic acid upon, after injection of aromatic diamidines, 562
Formaldehyde, simultaneous distillation of, from oxidized and unoxidized aliquots of urinary corticoid residues, a dual semimicrodistillation unit for, 948
Fungi, viruses, and bacteria, pathologic responses of guinea pigs infected cutaneously with, effect of cortisone on, 615

G

Gallium, urinary excretion of, by man and animals, 676
Gastric secretion in man, variable effect of atropine sulfate on fasting, 415
Globin, modified. I. Method for preparation from human erythrocytes, 959
Glomerulonephritis, effect of cortisone in, 133

H

Heart disease, potassium salts in, effects of 506
Hemagglutinins, high titer of cold, primary atypical pneumonia with, hemolytic anemia, and false positive Donath-Landsteiner test, 382
in hereditary spherocytosis and in acquired hemolytic anemia, studies of; their relationship to hypersplenic mechanism, 165
Hemochromatosis, radioiron studies in a case of, 665
Hemolytic anemia, idiopathic acquired, effect of ACTH in, as related to the hemolytic mechanisms, 444
Hemolytic anemia—Cont'd
primary atypical pneumonia with, high titer of cold hemagglutinins, and false positive Donath-Landsteiner test, 382
Hepatic disease, effect of cortisone acetate on, observations on two patients, 870
veins, ligation of, serum alkaline phosphatase in dogs following, 520
Hepatitis, infectious, epidemiology of, observations on, 104
Hereditary spherocytosis, hemagglutinins in, studies of, 165
Hyperbilirubinemia, rapid screening test for its detection, 477
Hypertension, experimental, effect of desoxycorticosterone and propylene glycol in, 499
Hypoprothrombinemia, Dicumarol-induced, in man, treatment of, with emulsified vitamin K_1 administered intravenously, 269

I

Infection, experimental, in guinea pigs, effect of cortisone on, 615
influenza virus type A, ACTH in treatment of experimental, 464, 603
Infections, influenza viral, in Boston, September, 1947 to August, 1949, 88
pneumococcal and influenza viral, effects of ACTH and cortisone on, in white mouse, 780
Infectious hepatitis, epidemiology of, observations on, 104
Influenza viral and pneumococcal infections, effect of ACTH and cortisone on, in white mouse, 780
infections in Boston, September, 1947 to August, 1949, 88
virus antibodies, identification of, by means of collodion particle agglutination reaction, 914
type A infection, ACTH in treatment of experimental, 464, 603
Insulin sensitivity, production of, with adrenocorticolytic drug DDD (2,2-bis (parachlorophenyl) - 1,1 - dichloroethane), 229
Internal standard flame photometer, application of, to analysis of biologic material, 621
Intestinal motility, effects of potassium chloride on, in human beings and dogs, 902
Intravenous nutrition, fat emulsion for, in rabbits, 222
Iodine, serum precipitable, artifactual values of, after clinical intramuscular injections of Mercuhydrin, 867
Ivy poisoning, zirconium treatment in, preliminary investigation, 909

J

Jaundice, bromsulfalein test in, 40

K

Kidney function tests, para-aminohippuric acid in, rapid method for determination of, 955
Kidneys, functional state of, twenty-four hourly endogenous creatinine clearance as clinical measure of, 743
King-Armstrong method, modified, for estimation of prostatic phosphatase by determining the formaldehyde stable and alcohol labile fraction of serum acid phosphatase, 637
Kodachrome film and a filmstrip holder, use of, in an improved method for titration of trypsin and trypsin-inhibitors, 494

L

Laboratory diagnosis of rickettsioses, comparative evaluation of several complement fixation techniques for, 388
of tuberculosis, mouse test for, evaluation of, 803
methods, 151, 316, 477, 621, 803, 948
L. E. cell, some observations on, 597
Leucocyte counts, effect of ACTH on, in white mice, 458
Ligation of hepatic veins, serum alkaline phosphatase in dogs following, 520
Lipoid nephrosis, plasma proteins of, demonstrated by electrophoresis, qualitative and quantitative changes in, 894
Liver, cirrhosis of, isomer distribution and per diem excretion of urinary coproporphyrin in, 8
dye clearance by, significance of decreased, following portacaval anastomosis, 515
function tests, studies on. II. Derivation of a correction allowing use of the bromsulfalein test in jaundiced patients, 40
Lung, normal guinea pig, analysis of, for factors determining pulmonary edema and congestion, 143
Lupus erythematosus disseminatus, ACTH in, response of serum gamma globulin level and complement titer to, 698

M

Malnutrition, eosinophile response in, and in chronic disease, 593
Manometers, resistance wire, an inexpensive carrier amplifier for use with, 810
Mercuhydrin, clinical intramuscular injections of, artifactual values of serum precipitable iodine after, 867
Methionine in blood and urine, colorimetric method for estimation of, application of, 820
Microbiologic assay of antibiotics, nonspecific inhibition by serum and urine in, 575
Micromethod for prothrombin time determinations, 807
Microorganisms, growth of, culture flask for estimation of, by optical methods, 325
Mouse test for laboratory diagnosis of tuberculosis, evaluation of, 803

N

Nephropathy of disseminated lupus erythematosus, effect of cortisone in, 133
Nocardia asteroides, studies of its pathogenicity and drug sensitivities, 713
Nonglucosamine polysaccharides of the serum proteins, estimation of, with the anthrone reagent, 736
Nuclei and cytoplasm, fluorescence of, influence of nucleic acid upon, after injection of aromatic diamidines, 562
Nucleic acid, influence of, upon fluorescence of nuclei and cytoplasm after injection of aromatic diamidines, 562
Nutrition, intravenous, fat emulsion for, in rabbits, 222

O

Octab, reaction of human serum and component proteins of human plasma with, 721
O_2 consumption of patients during cardiac catheterization, simplified, accurate method for determining, 630
Oxygen tension and pH, effect of, on sickling and mechanical fragility of erythrocytes in sickle cell anemia and the sickle cell trait, 789
reaction of bone marrow to high, in normal and anemic guinea pigs, 936

P

PABA, reducing substance in the urine of patients treated with, 425
Para-aminobenzoic acid, reducing substance in urine of patients treated with, 425
Para-aminohippuric acid in kidney function tests, rapid method for determination of, 955
Passive sensitization, experimental production of arteritis by, effect of cortisone on, 764
Penicillin, assay of, in capillary blood and other body fluid, a single, simple, turbidimetric method for, 155
plasma levels, effect of Benemid on, 272
Penicillin-resistant staphylococci, clinical and biologic significance of, including observations with streptomycin, aureomycin, chloramphenicol, and terramycin, 278
Perfusion technique for recovery of schistosomes, a modified, 815
Peripheral vascular conditions, vasodilatation in, comparative effects of ether, alcohol, tetraethylammonium, and Priscoline in producing, 365
pH of whole arterial blood, 129

Phenol levels, quantitative, relationship of xanthoproteic indices to, in various azotemic states, 544
Phosphatase, prostatic, estimation of, using a modified King-Armstrong method by determining the formaldehyde stable and alcohol labile fraction of serum acid phosphatase, 637
Photochromatographic analysis of amino acids in body fluids, 885
Photometer, internal standard flame, application of, to analysis of biologic material, 621
Physician, the inquiring (presidential address, Central Society for Clinical Research, twenty-third annual meeting), 2
Plasma, Dicumarol in, colorimetric method for determination of, 321
  fibrinogen content of stored, 311
    in small samples of, new method for determination of, 316
  penicillin levels, effect of Benemid on, 272
  proteins of lipoid nephrosis demonstrated by electrophoresis, qualitative and quantitative changes in, 894
    plasma volume, and volume of packed red cells in patients receiving ACTH or cortisone, alterations in, 431
  prothrombin assay, the two-stage, some factors concerned with, 294
Pneumococcal and influenza viral infections, effect of ACTH and cortisone on, in white mouse, 780
Pneumococcic pneumonia, primary, at Cincinnati General Hospital, 1936-1950, 73
Pneumonia, primary atypical, with high titer of cold hemagglutinins, hemolytic anemia, and false positive Donath-Landsteiner test, 382
    pneumococcic, Cincinnati General Hospital, 1936-1950, 73
Polymyxin B and polymyxin E, clinical and laboratory studies, 402
Porphyrin chromogens or precursors in urine, blood, bile, and feces, 831
Portacaval anastomosis, dye clearance by liver following, significance of decreased, 515
Potassium chloride, effects of, on intestinal motility in human beings and dogs, 902
  salts in heart disease, effects of, 506
Precipitation of cerebrospinal fluid globulin by zinc sulfate, 374
Pregnancy, induced, in mammalian host following severe total body x-irradiation, 331
  serum proteins in, 538
Priscoline, ether, alcohol, and tetraethylammonium, comparative effects of, in producing vasodilatation in peripheral vascular conditions, 365
Propylene glycol and desoxycorticosterone, effect of, on experimental hypertension, 499
Prostatic phosphatase, estimation of, using modified King-Armstrong method by determining the formaldehyde stable and alcohol labile fraction of serum acid phosphatase, 637
Protein hydrolysates and amino acids, effect of various, on uremic rat, 207
Proteus vulgaris, effect of combinations of antibiotics on, in vitro and in vivo, and on Pseudomonas aeruginosa, 584
Prothrombin time determinations, micromethod for, 807
Pseudomonas aeruginosa, effect of combinations of antibiotics on, and on Proteus vulgaris, in vitro and in vivo, 584
Pulmonary edema and congestion, analysis of normal guinea pig lung for factors determining, 143
Pulse wave velocity, electrokymograph for determination of, 974

Q

Quantitative phenol levels, relationship of xanthoproteic indices to, in various azotemic states, 544
Quaternary ammonium salt, reaction of human serum and component proteins of human plasma with, 721
    reaction of human serum with; results of serial study in acute rheumatic fever, 728

R

Radiation injury, recovery from, further studies on, 683
Radioactive di-iodo^{131}-fluorescein, health physics aspects of its use for diagnostic studies, 122
Radiogallium as a diagnostic agent in bone tumors, studies of, 239
Radioiron studies in case of hemochromatosis, 665
Radioisotopes, recovery and estimation of, from biologic materials. II. The electroplating apparatus. Procedures for copper, silver, zinc, mercury, iron, and cobalt, 644
Recovery of schistosomes, modified perfusion technique for, 815
Renal defect in tuberculous meningitis; salt losing conditions, 550
Rheumatic fever, acute serial study of results of reaction of human serum with a quaternary ammonium salt in, 728
Rheumatoid arthritis, serum in, electrophoretic characterization of, 264
Rh_0 antibodies, method for detecting, in extremely low titer, 825
Rickettsioses, laboratory diagnosis of, comparative evaluation of several complement fixation techniques for, 388

S

Saline solutions, buffered, toxic effect of, on viability of Brucella abortus, 579
Salt losing conditions; renal defect in tuberculous meningitis, 550
Schistosoma japonicum, infecting small mammals with, technique for, 817
Schistosomes, recovery of, modified perfusion technique for, 815
Serum acid phosphatase, determining the formaldehyde stable and alcohol labile fraction of, estimation of prostatic phosphatase using a modified King-Armstrong method, 637
alkaline phosphatase in dogs following ligation of hepatic veins, 520
and spinal fluid, chlorides in, microdetermination of, 950
and urine, nonspecific inhibition by, in microbiologic assay of antibiotics, 575
gamma globulin level and complement titer, response of, to adrenocorticotropic hormone (ACTH) therapy in lupus erythematosus disseminatus, 698
in rheumatoid arthritis, electrophoretic characterization of, 264
lipid and protein fractions. III. Diseases of the mesenchyme, 532
precipitable iodine, artifactual values of, after clinical intramuscular injections of Mercuhydrin, 867
proteins in pregnancy, 538
nonglucosamine polysaccharides of, estimation of, with the anthrone reagent, 736
reaction of human, and component proteins of human plasma with a quaternary ammonium salt, Octab, 721
with a quaternary ammonium salt; results of serial study in acute rheumatic fever, 728
Sickle cell anemia and the sickle cell trait, effect of oxygen tension and pH on sickling and mechanical fragility of erythrocytes in, 789
Spherocytosis, hereditary, hemagglutinins in, studies of, 165
Spinal fluid, chlorides in, microdetermination of, 950
Staphylococci, penicillin-resistant, clinical and biologic significance of, including observations with streptomycin, aureomycin, chloramphenicol, and terramycin, 278
Stools, streptomycin-resistant coliform bacilli in, of tuberculous patients treated with intramuscular streptomycin, 64
Streptomycin, assay of, in capillary blood and other body fluid, a single, simple, turbidimetric method for, 155
intramuscular, tuberculous patients treated with, streptomycin-resistant coliform bacilli in stools of, 64
Streptomycin—Cont'd
protection of intracellular Brucella against, and in combination with other antibiotics, 924
Syringospora (Monilia, Candida) albicans, in vivo and in vitro effect of aureomycin hydrochloride on, 703

T

Terramycin, assay of, in capillary blood and other body fluid, a single, simple, turbidimetric method for, 155
Tetraethylammonium, Priscoline, ether and alcohol, comparative effects of, in producing vasodilatation in peripheral vascular conditions, 365
Thrombin clotting time of blood, effect of fibrinogen concentration on, 303
Tissue culture, a simplified continuous-flow apparatus for, 162
Titration of trypsin and trypsin-inhibitors, improved method for, use of Kodachrome film and a filmstrip holder in, 494
T-1824 and P^{32} labeled red cell methods, blood volume determination, comparison, 342
Trypsin and trypsin-inhibitors, titration of, an improved method for, use of Kodachrome film and a filmstrip holder in, 494
Tuberculosis, laboratory diagnosis of, mouse test for, evaluation of, 803
Tuberculous meningitis, renal defect in; salt losing conditions, 550
2,4-Dinitrophenylhydrazone method for determining total acetone and ketone bodies, modification of, 643
Typhoid fever, epidemic of, at Spenard, Alaska, 931
Typing study of one hundred fifty thousand bloods, 634

U

Ultrafilter for concentration of urinary gonadotropin, an improved, 485
Ultrafiltrates, apparatus for preparing, an easily constructed, 481
Uremic rat, effect of various protein hydrolysates and amino acids on, 207
Urinary coproporphyrin, determination of, improved method for, and an evaluation of factors influencing the analysis, 843
isomer distribution and per diem excretion of, in cirrhosis of liver, 8
coproporphyrins, effect of alcohol on per diem excretion and isomer distribution of, 29
corticoid residues, distillation of formaldehyde from oxidized and unoxidized aliquots of, dual semimicrodistillation unit for simultaneous, 948
excretion of gallium by man and animals, 676
gonadotropin, concentration of, improved ultrafilter for, 485

Urine, blood, bile, and feces, porphyrin chromogens or precursors in, 831
reducing substance in, of patients treated with para-aminobenzoic acid, 425
Urobilinogen formation and fecal flora, effect of aureomycin on, 52

V

Vasodilatation in peripheral vascular conditions, comparative effects of ether, alcohol, tetraethylammonium, and Priscoline in producing, 365
Ventilation meter for clinical use, an integrating, 828
Virus type A infection, influenza, ACTH in treatment of experimental, 464, 603
Viruses, fungi, and bacteria, pathologic responses of guinea pigs infected cutaneously with, effect of cortisone on, 615
Viruses—Cont'd
neurotropic, complement-fixing antigens of certain, method for increasing the yield of, and the use of newborn mice for their production, 663
Vitamin K_1, emulsified, treatment of Dicumarol-induced hypoprothrombinemia in man with, 269

X

Xanthoproteic indices, relationship of, to quantitative phenol levels in various azotemic states, 544
X-irradiation, induced pregnancy in mammalian host following severe total body, 331

Z

Zinc sulfate, precipitation of cerebrospinal fluid globulin by, 374
Zirconium treatment in ivy poisoning, preliminary investigation, 909

The Journal of Laboratory and Clinical Medicine
